THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

Election/Restrictions

1. Claims 47, 49-66, 68-82, and 92 are allowable. The restriction requirement among Species I-X, as set forth in the Office action mailed on 3/13/2009, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 49-52, 62, 68-79, and 81-82, directed to species pertaining to an illumination system for a microlithography projection exposure system for illuminating an illumination field with light from a primary light source are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 83-91, directed to a method of making an illumination system for microlithography projection and species pertaining to an illumination system for a microlithography projection exposure system for illuminating an illumination field with light from a primary light source remain withdrawn from consideration because they do not all require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. This application is in condition for allowance except for the presence of claims 83-91 directed to inventions or species non-elected without traverse. Accordingly, claims 83-91 been cancelled.

The application has been amended as follows:

Claims 83-91: Cancelled.

Allowable Subject Matter

3. Claims 47, 49-66, 68-82, and 92 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claim 47, the prior art of record, either alone or in combination, neither teaches nor render obvious an illumination system for a microlithography projection exposure system, the illumination system comprising: "a light distribution device which receives light from the primary light source and which produces a two-dimensional intensity distribution in a pupil-shaping surface of the illumination system, wherein the light distribution device variably sets the two-dimensional intensity

distribution" where the light distribution device comprises at least one optical modulation device which controllably changes the angular distribution that comprises "an array of individual elements that are driven individually to change an angle of radiation incident on the individual elements" and between the light source and the optical modulation device, an optical device which "concentrates radiation incident on the optical device onto the individual elements of the optical modulation device, wherein the optical device forms a plurality of beams from the incident radiation and concentrates each of the plurality of beams onto a respective individual element of the optical modulation device." These limitations in combination with the other limitations such as the illumination system comprising an axicon system arranged between the optical modulation device and the pupil-shaping surface render claim 47 non-obvious over the prior art of record.

As noted by Applicant on pages 19-21 in the arguments filed 8/27/2009, Singer (US PGPub 2002/0136351) discloses an EUV illumination system and it would not have been obvious to modify the EUV illumination system of Singer with the axicon taught by Wangler (US Patent No. 6,285,443) since an axicon pair would not function properly in an EUV system.

Furthermore, Mulder et al. (EP 1426823 A1, submitted with Applicant's IDS filed 3/13/2006) discloses an illumination system with an optical modulation element (120, Fig. 1) with multiple individually controlled elements, a pupil shaping surface (183, Fig. 2), and an axicon (122, Fig. 2) between the optical modulation element and the pupil shaping surface. However, Mulder does not disclose an optical device that forms multiple beams from the light source and concentrates the beams onto respective

individual elements of the optical modulation device. It would not have been obvious to one of ordinary skill in the art to have modified Mulder to include an optical device that forms multiple beams from the light source and concentrates the beams onto respective individual elements of the optical modulation device. For instance, Shiraishi (US PGPub 2002/0033936) discloses a fly eye lens (fly eye lens 7, Fig. 1), but a fly eye lens is used to integrate light or perform light mixing and would not "form a plurality of beams from the incident radiation and concentrate each of the plurality of beams onto a respective individual element of the optical modulation device."

The claims dependent upon claim 47 are likewise allowable by virtue of their dependency upon the allowable independent claim as stated above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
